Coinbase Wallet Compromise & Ledger of Ethical Response

Author: Christopher Cannon
Business Entity: Christopher Cannon Art (CCA)
Category: Satirical Art & Advertising / Web3 Financial Recovery
Date: 2025

Part I: Executive Summary

This document is a practical and ethical archive. It reflects a real-world financial incident involving the unauthorized transfer of Solana tokens from a Coinbase Wallet and offers a

blueprint for those seeking peace-driven digital accountability. It is part of an ongoing public archive curated by Christopher Cannon, highlighting artistic, technical, and social responses to harm.

Part II: Incident Log & Recovery Protocol

Wallet Compromise Details (2025):

- **Token Type:** *Solana (SOL)*
- **Wallet Type:** *Coinbase Wallet (mobile)*
- **Compromise Type:** *Unauthorized asset transfer, despite secret phrase not being disclosed*
- **Suspected Entry Point:** *Possibly via residual contract approvals, scam token interaction, or a platform-side exploit*

Immediate Recovery Steps:

1. **Create a New Wallet**
   - *Recommended platforms: MetaMask or Coinbase Wallet*
   - *Do not reuse any prior seed phrases or browser extensions*
   - *Store your new recovery phrase securely and offline*
2. **Transfer Remaining Tokens**
   - *Move only verified, recognized tokens to the new wallet*
   - *DO NOT interact with any unknown or airdropped assets*
   - *Use **Solscan** to verify token legitimacy*
3. **Revoke Malicious Contract Approvals**
   - *Use: [Step Finance Token Management](#)*
   - *Optional tools: Solana Shield or Blowfish browser extensions*
   - *On mobile: Settings → Trusted Apps → Remove untrusted approvals*
4. **Report the Incident**
   - *Submit a full report at [Chainabuse](#):*
     - *Include wallet addresses (sender and receiver)*
     - *Describe what was taken and the approximate value*
     - *Attach screenshots and time of event*
   - *Optional: Report to Coinbase Wallet Help Center to request address flagging and support*
5. **Long-Term Protection (Recommended)**
   - **Use a Hardware Wallet**: *Ledger Nano S/X*
   - *Only interact with trusted and audited dApps*
   - *Avoid engaging with suspicious tokens, popups, or unsolicited DMs*

Part III: Contextual Ledger & Ethical Reflection

This document was prepared by a working artist affected by criminal interference in the Web3 ecosystem. It is a record of harm — and of a nonviolent effort to respond through clarity and persistence. These reflections, like others in the public archive, form part of a creative resistance.

This is not about glorifying blockchain. It is about remembering through it.

"If one professor reads this and understands what's being protected here — then the chain worked."
